One-Year Warranty

Your new Kawasaki JET SKI® personal watercraft comes with a 12-month limited factory warranty. Read the next paragraph to find out how you can extend your coverage inexpensively, or ask your dealer for details about the factory warranty and available extended coverage.

Up to Four Years Additional Coverage*

Let Kawasaki protect your new machine for years to come* with the exclusive Good Times™ Protection Plan. This plan repairs or replaces most components free of charge if found defective in material or workmanship. Everything about the plan is easy: There's no deductible. It's honored at every authorized Kawasaki JET SKI watercraft dealer nationwide. And it's transferable to another owner with no fee. Just ask your dealer how you can buy additional coverage of 12, 24, 36 or 48 months. Imagine, for just pennies a day, you can ride with no worry and no hassle. Just tell your dealer you want the Good Times Protection Plan.

*Depending on the program purchased.

Ride With Zero Down**

We offer up to 100% instant financing on most Kawasaki products with the Good Times™ Credit Plan¹ or Good Times™ Credit Card. Qualified buyers can ride away with a brand-new Kawasaki with no down payment. In most cases, the computerized credit approval takes just minutes. You can even add insurance, accessories and the Good Times Protection Plan to your contract. Ask your participating dealer for details.

**Qualified buyers. ¹Good Times Credit Plan not available in Canada.

Specifications subject to change without notice. Availability may be limited. Accessories available at extra cost. JET SKI watercraft are inboard boats and their use is subject to all applicable state and local boating laws. Always wear a USCG-approved personal flotation device, life vest, and other appropriate safety apparel.

Safe Riding's More Fun

Ride responsibly. Kawasaki believes safety begins with us and continues with you. Never ride under the influence of drugs or alcohol. Respect the rights of shoreline residents and other marine recreationists. Riding is more fun on a well-maintained machine...follow the instructions in your owner's manual. Remember, riding safe is smart.

Boat Smart From The Start

Life at its best

Ski. See. Dive. Relax. It's all in a day's work for JET SKI® watercraft owners. And to help you get the most enjoyment on the water, Kawasaki offers a wide range of genuine accessories designed just for the JET SKI lifestyle. Choose from stylish color-matched life vests, convenient luggage sets, a soft cooler and a handy stowable anchor, to protective mooring bumpers, custom-fitted Vacu-Hold® covers and plenty more. So grab some friends and head out to your closest body of water. Because when it comes to Good Times™, Kawasaki definitely has you covered.

JET SKI® ULTRA 250X

Two hundred and fifty horsepower is a healthy amount in a boat. In a JET SKI® watercraft, it's the class leader for performance. Which is exactly why the JET SKI ULTRA® 250X pulls hoeshots like a dragster and rips across open water like what it is—the most powerful personal watercraft in Kawasaki history. The ULTRA 250X gets its power from a Supercharged Marine engine, which uses a Roots-type air pump to continuously supply super-dense air—as a special intercooler drops the pressurized air temperature right back to ambient levels. Delivering up to 11.4 psi of horsepower-enhancing boost, the supercharger kicks the 1,498cc Marine engine to previously unimaginable performance. Its specially designed deep-V hull, comfortable 3-passenger seating, and exceptionally stable rough-water capabilities mean you can tackle almost any adventure. Needless to say, the ULTRA 250X is not for the meek or hesitant. But if you're ready, climb aboard.

SUPERCHARGED PERFORMANCE

1 The JET SKI Ultra 250X watercraft features the ultimate Marine powerplant with a Supercharged, intercooled, 1,498cc engine with digital fuel injection that offers up the terrific acceleration and performance on the water.

- The Supercharger forces two liters of air into the engine with every revolution, providing highly pressurized air at all rpm which in turn provides a very flat torque curve for free-flowing power across the rev range and none of the lag associated with turbochargers.

2 The JET SKI Ultra 250X watercraft features an large analog tachometer and a multi-function digital speedometer with boost gauge. The handlebar adjusts 5 ways for added rider comfort, plus there's a total of 60 gallons of class-leading storage capacity.

- Featuring the latest in deep-V hull designs, the Ultra 250X slices through chop and swells for a very smooth, stable ride. Yet it provides quick and nimble handling when a lean-in turning style is used. High-performance, race-inspired sponsons hook up in the water, further contributing to the quick handling characteristics.

JET SKI® ULTRA LX

Now here's a recipe for family Good Times.™ The JET SKI® ULTRA® LX personal watercraft delivers the same reassuring ride, precise handling and roomy accommodations as our flagship ULTRA 250X—but it's powered by a more affordable and slightly less audacious normally aspirated 1,498cc Marine engine. Translation: With room for up to three on board, you and your family can ski, wakeboard and sightsee in total comfort and control. The ULTRA LX has the longest JET SKI hull in history—more than 11 feet of deep-V prowess, with special Quattro Kawasaki Splash Deflectors that help provide a dry ride. And it's loaded with top-shelf features such as a wide rear deck for easy staging, 60 gallons of storage capacity, and a 5-way adjustable handlebar. Kawasaki Smart Steering® helps riders learn proper turning techniques. But maybe the best feature is the ULTRA LX's big 20.6-gallon fuel tank that lets you ride all day long.

POWERFUL FAMILY FUN

1 Advanced, multi-function digital instrumentation includes a large speedometer. Smart Learning Operation (SLO) features a separate ignition key that limits maximum engine speed so novice riders can experience riding at reduced speed while they master proper riding techniques.

- Five-way adjustable handlebar allows the rider to stand or sit comfortably and is designed to suit a wide range of riders.
- The Ultra LX offers the largest fuel capacity of any machine in its class with a 20.6-gallon fuel tank and is C.A.R.B. (California Air Resources Board) certified with a Three Star Ultra-Low Emissions rating.

2 Strong 1,498cc DOHC 4-stroke Marine engine provides excellent low- and midrange torque. Four valves per cylinder provide better intake and exhaust flow to improve torque and power that translates into excellent acceleration.

- Digital fuel injection with 60mm throttle body provides great throttle response, smooth engine performance and quick acceleration, as well as easy starting and excellent fuel economy.

JET SKI® STX-15F

Take a look at the specifications of the JET SKI® STX-15F personal watercraft and you'll immediately understand. Boasting the same high-performance 1,498cc Marine engine as the ULTRA® LX, the STX-15F is shorter, lower and lighter. This makes it among the quickest-performing 3-person personal watercraft you can buy—and one of the best buys, too. Rated at 160 thrilling horsepower, its robust DOHC In-Line Four can pull a skier or wakeboarder with ease, and power you across huge expanses of water with two friends or family aboard. Its performance-shaped deep-V hull tracks arrow-straight at high speeds, carves dramatic turns on its racing-inspired chines, and rides high and dry in rough chop. And despite its agreeable price, the STX-15F also boasts plenty of premium features including digital fuel injection, generous onboard storage, crisp LCD instrumentation, a retractable boarding step, rearview mirrors and even a Smart Learning Operation (SLO) button that limits engine power while you're learning to ride.

POWERFULLY
AFFORDABLE

1 Quiet and clean running thanks to a very efficient Kawasaki Marine engine with electronic fuel injection and double waterbox mufflers, the STX-15F is C.A.R.B. (California Air Resources Board) certified with a Three Star Ultra-Low Emissions rating.

- The STX-15F features strong engine performance with 1,498cc DOHC powerplant for excellent "out of the hole" acceleration even when pulling a wakeboarder or towable.

2 The STX-15F sitdown watercraft features a reverse gear and direct-drive coupling from the engine to the 3-blade stainless steel impeller for quick, efficient power transfer.

- Plenty of room for three passengers with 23.5 gallons of waterproof storage under the seat and in the bow, plus a handy compartment located near the control center is perfect for sunglasses or keys.
- When activated, Smart Learning Operation (SLO) helps riders practice their skills operating a personal watercraft at reduced speeds.

JET SKI® 800 SX-R

Does this racy JET SKI® watercraft silhouette look familiar? How about the grin on the rider's face? They both should—because the 800 SX-R™ is the direct descendent of the original JET SKI watercraft that Kawasaki pioneered over 35 years ago. And the 2008 model is also the direct beneficiary of everything we've learned about stand-up performance since. With 80 horsepower on tap, the potent 781cc two-stroke In-Line Twin Marine engine can launch the lightweight stand-up hull quickly out of the water, carve buoys like a slalom skier, and pull off freestyle tricks all your own. But as advanced as the JET SKI 800 SX-R performance capabilities are, we've also incorporated some easy-to-ride features into the hull design, such as generously sized footwells and full-length chine lines for quick planing. Ready, set, shred!

STAND-UP PERFORMER

1 Based on the original JET SKI model and the perennial favorite among hardcore watercraft enthusiasts, the SX-R sports a high-performance 781cc twin-cylinder Marine engine that delivers serious thrust for serious acceleration and fun.

- A large capacity airbox lowers engine noise and improves air intake flow into the twin carburetors for excellent throttle response and optimum performance at all rpm ranges.

2 The axial flow, single stage, 3-blade stainless steel impeller for the jet pump produces 699 pounds of thrust. Deep chines, a wide ride plate and spacious foot tray make for exciting times on the water for beginners and advanced riders alike.

- The water-jacketed exhaust system reduces noise levels and is tuned for peak performance at low- and high-speeds.
- The most advanced hull on a stand-up JET SKI watercraft, the 800 SX-R is in a class by itself when it comes to turning ability. The 800 is also the most stable platform made to date, which shortens the learning curve.
